

Task Explanation - Web Development

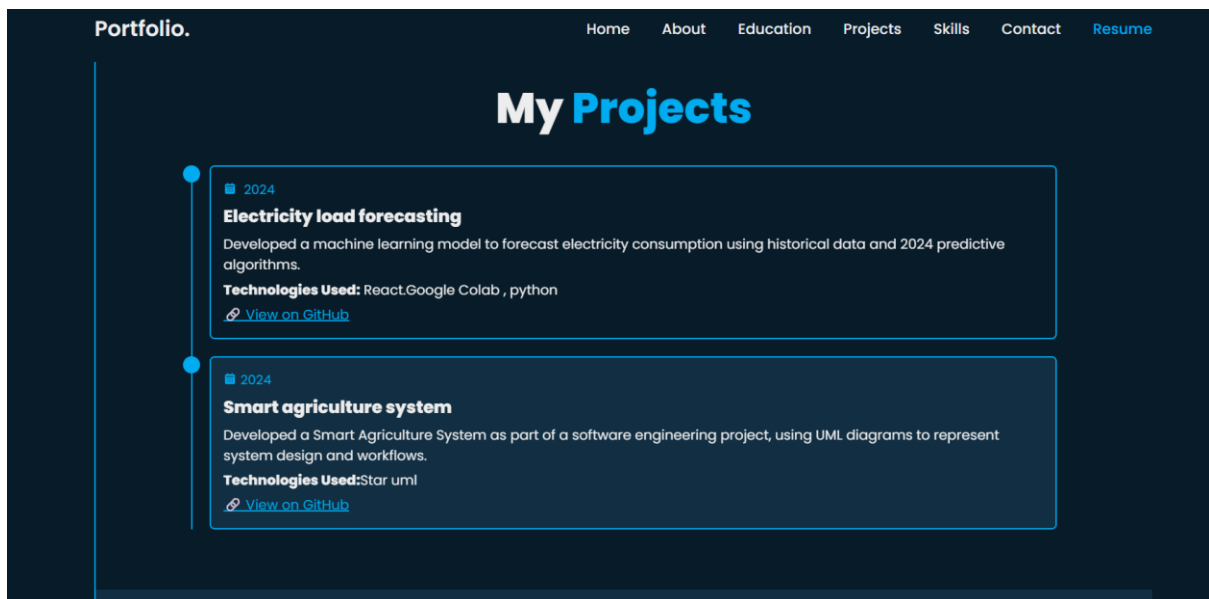

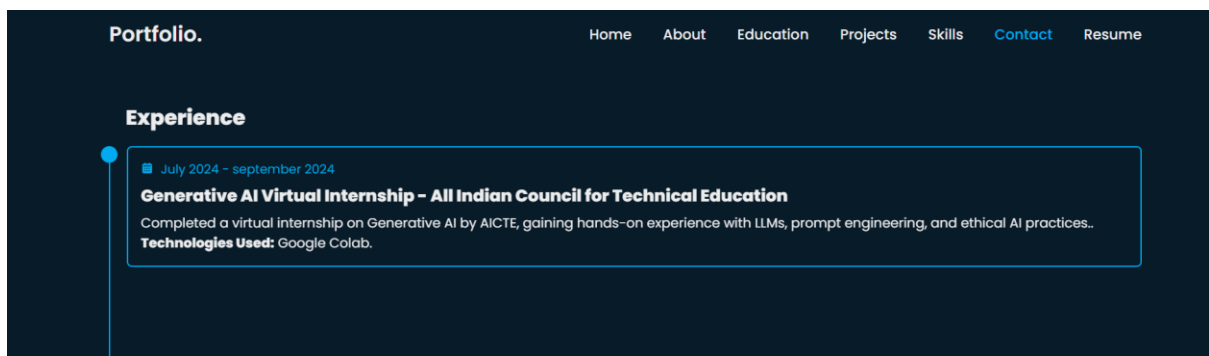

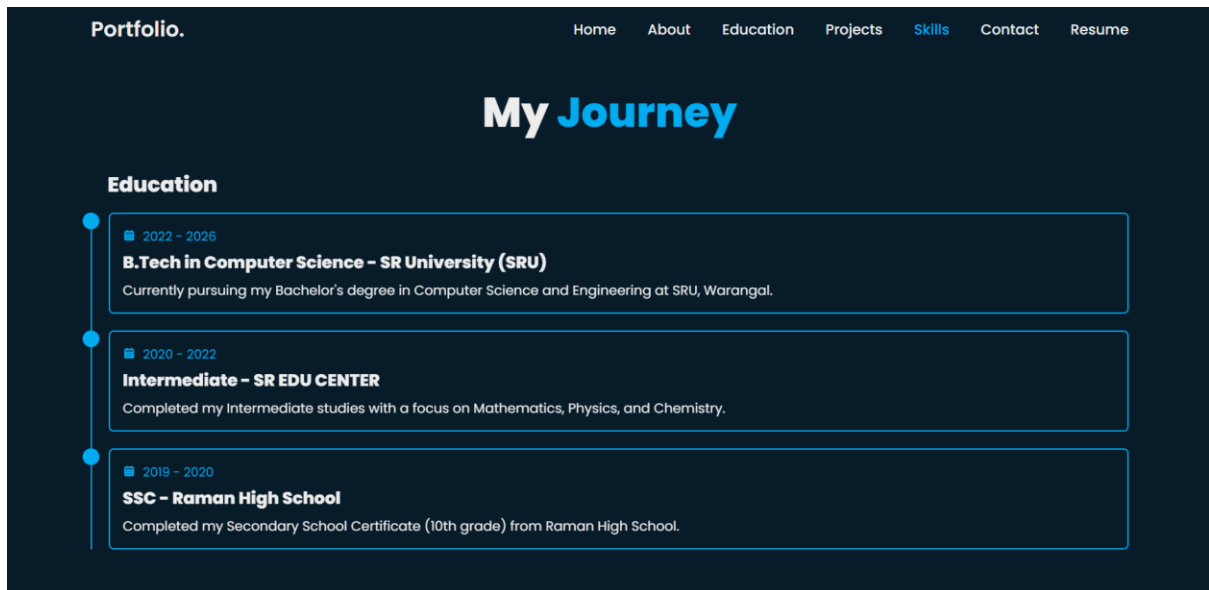

Completion of at least one level will make you eligible for the certification. The certification will not state which level you have completed. The swags that you will receive have already been explained in the orientation meeting, you can watch the recording for that.

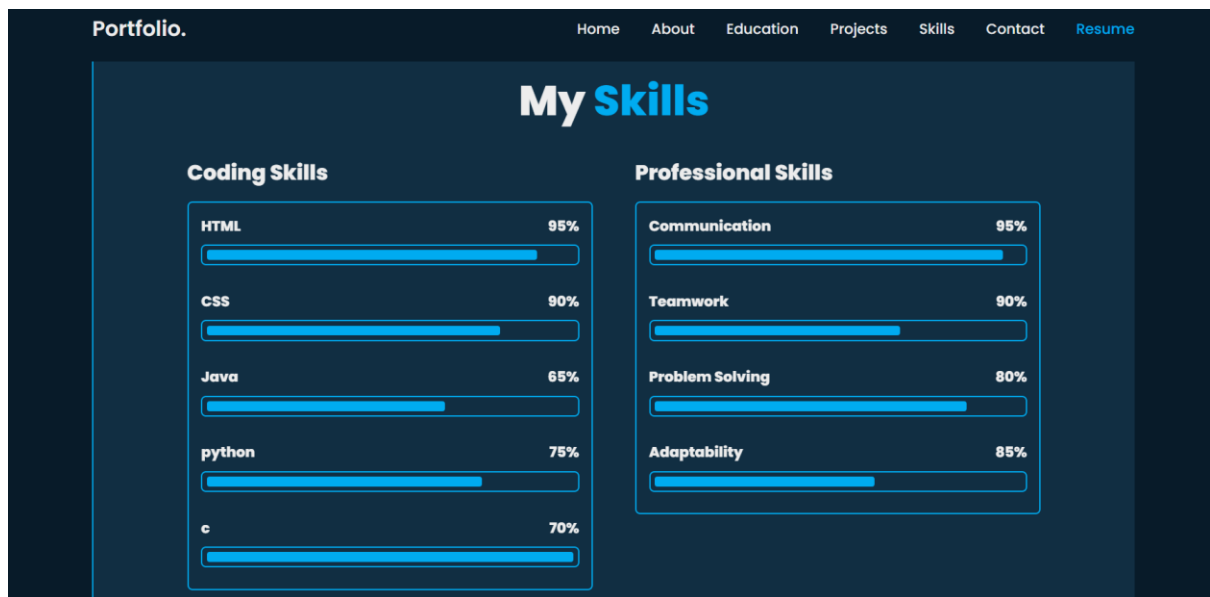

Beginner Level - (Only 1 Task) You are required to build a portfolio if you don't have one. The description of this task and the objectives are in the task list. Since it's a straightforward task, we expect no doubts will arise here.

Once this task is over, kindly approach the program coordinator via mail at aakash@shadowfox.in by sharing your work. It would be better if you deploy it anywhere and send the deployed link.
